StockPulse — Design Brief / Brand Kit

Note: There is **no fixed official logo or locked brand book** yet. This PDF records **what the app uses today**. If you ask for brand changes later, this document will be updated to match.

---

1. Product name

StockPulse — shown in the app header and on login / setup screens as a small brand label above the business name.

There is no separate logo image file in the project yet. The brand signal is the **wordmark "StockPulse"** in navy type on a cream background.

---

2. Color palette (current)

Token	Hex	Role in the UI
Cream	`#FAF6EE`	Page background, soft panels
Navy	`#2D3B5E`	Primary text, primary buttons, headings
Gold	`#D9A947`	Soft highlights / status borders
Sage	`#EDF3E7`	Soft green tint (supporting)
Pine	`#1E4630`	Success / positive price change
Clay	`#B4552E`	Errors / alerts / negative price change
White	`#FFFFFF`	Cards, inputs, secondary surfaces

Primary button style: **navy background + cream text**.
Secondary: white with navy border/text.

---

3. Typography

Item	Current choice
Primary UI font	**DM Sans** (loaded as `--font-dm` in the app layout)
Fallbacks	Segoe UI, Tahoma, Nirmala UI, system sans
Body text	Medium weight navy / navy at reduced opacity
Page titles	Bold, about **2xl–4xl** on large screens

Section headings	Bold, about **lg** (`text-lg font-bold`)
Labels	Medium, slightly muted navy
Numbers (qty / money)	Bold, large tracking-tight figures

All UI copy supports the app languages already in the product (English and others via i18n); this brand kit itself is written in **English**.

---

4. Headings and titles (pattern)

Level	How it appears in the app
App / screen title	Large bold navy (`h1` style via shared UI)
Section title	Smaller bold navy (`h2` / `text-lg font-bold`)
Support line	Regular muted navy under the title
Nav labels	Medium / semibold depending on active state

Documentation PDFs in this pack use a fixed scale: main headings **20pt**, subheadings **18pt**, body **11pt**.

---

5. Layout and UI feel

- Soft **cream** full-page background (not flat pure white).
- White content cards with light shadow (“depth” / lift on press).
- **Rounded** controls (pills for buttons, ~14px card radius).
- Sticky header with cream/blur and business name.
- Mobile-first spacing; large readable stock numbers on dashboard.

---

6. Logo / brand assets (status)

Asset	Status
Official logo SVG/PNG	Not fixed yet
Wordmark “StockPulse”	In use in UI
Favicon / PWA theme	Theme color cream `#FAF6EE`

When a logo file and rules are decided, add them here and regenerate this PDF.

---

7. Do / don’t (for future edits)

- Keep navy + cream as the main identity unless you request a change.
- Prefer pine for “good” and clay for “bad/alert,” not random reds/greens.
- Do not introduce a second unrelated color system without updating this kit.
